

You know these 45mm diameter embossed golden stickers?

I am going to get an embosser stamp made for these stickers. But I don't really have the eye for the stamp design, so looking for support.

I would like this logo to be the centre focus of this design with some text and/or decoration around it to help balance white space between the logo and the edge of the sticker

xn--ys7c

The logo is a stylised unicode character: 𐄂 (U+100AB)

The text can be references to the specifications of this unicode glyph

(below) e.g. UTF-8&UTF-16 Specs "*linearBideogram*" etc...

<https://www.compart.com/en/unicode/U+100AB>

<https://codepoints.net/U+100AB?lang=en>

And also some instructional lines to use this unicode character to access a sort of secret website.

- **Exact text TBD**
- **Graphic decorations- IDK, hoping to get some help regarding that... I don't have that eye for graphical style.**
